- Tsitsikamma Community wind farm
  - Project Overview
  - Project Location
  - Environmental Consent
  - Economic Development
  - Community Trusts
- Questions
The Tsitsikamma Development Trust ("TDT") was established in 2006 as a mechanism to assist with the land distribution and development of the Amamfengu community who reside within a 50km radius of the project site.

A Bewind Trust has been created with the following principle objectives:

- To act as the legal and commercial trading agent of the TDT;
- As a 9% equity shareholder (of which 2.5% is free carry) in TCWF the TDT will receive income through dividend pay-outs once the wind farm is fully operational and revenue generating;
- The dividends will be used to fund initiatives identified by registered beneficiaries. These initiatives will positively impact the socio-economic status of the Amamfengu community respectively, particularly with regards to land development and housing as stated in the TDT Trust Deed.
Thank you
